Dear Justice Department,

Pls forget about Microsoft case. They have done something for this country that could not be forgotten in the history of this entire world. They have brought enough money to feed millions of Americans. I believe that's enough. In any free world people just want to sue people for fun or nothing or to satisfy themselves by taking the shadow of the law. Just kick these people out so Microsoft can do some other job and shake the World. Please.

Thanks

David John
